Who Should Attend

The 2018 National Medical Association’s Annual Convention and Scientific Assembly is planned as an educational reinforcement for practicing physicians, related health professionals, trainees and residents representing a variety of medical specialties and health professions.

Format

Workshops “hands on” activities and seminars addressing critical concerns of medical specialists will be held on Saturday and Sunday. Lectures, panels, and demonstrations will be provided throughout the week. Guest health care provider lecturers from leading institutions, National Medical Association physician experts, basic scientists, and residents and students in competition will bring to the Assembly current management of diseases confronted in today’s medical practice.

Program Objectives

The scientific activity is designed to provide educational enrichment through special sessions, postgraduate courses and specialty sessions from twenty-four separate specialties. In-depth review of updated diagnostic methods and therapeutics will be discussed in an effort to prepare the participating physician for current medical practice in his/her field of specialty. Combined specialty sessions will provide opportunities for exchange of ideas and debate.

Educational Credits

The National Medical Association is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical Education for physicians.

The National Medical Association designates this live activity for a maximum of 40 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

DISCLOSURE:

Lecturers, panelists, and planning committee members have disclosed relationships with commercial organizations. These relationships are also to be disclosed by the lecturer at the time of presentation.

OFF LABELED DRUGS:

All speakers must acknowledge the status of drugs discussed and not approved for in-patient care.
