

R. Frank Jones Urological Society 2023 National Medical Association Meeting in
New Orleans, Louisiana

Hyatt Regency 601 Loyola Ave, New Orleans, LA 70113

Room FOSTER 1

Learning Objectives:

The learning objective for this activity is to explore how systemic racism has affected the practice of Urology and the health and wellbeing of Black patients as well as Black Urologists.

1. Discuss recent scientific papers on the barriers to access for up-to-date clinical treatment in urologic care for Black patients.
2. Discuss the impact of systemic racism on Black physicians and creating opportunities for more Black students to become urologists.
3. Discuss the history and legacy of Black urologists' In America

Saturday, July 29, 2023

Retired urologist and public health official who champions holistic approaches to health management. CEO of Trevention Incorporated

“Can we grow our own food?”

3:30pm-3:50pm

Panel Discussion and Questions

3:50pm-4:00 pm

Post test

Brief History

The R. Frank Jones Urological Society is the Urology Section of the National Medical Association (NMA). The NMA was created in 1895 to represent the interests of Black physicians. As the leading force of parity and justice in medicine and the elimination of disparities in health, the NMA is committed to improving the health status and outcomes of minorities and other underserved populations. While the NMA has historically focused on health issues related to Blacks, its principles, goals, initiatives, and philosophy address and benefit all Americans. The R. Frank Jones Urological Society was officially formed in 1965. The Society represents Black urologists across the United States and meets bi-annually during the American Urological Association and National Medical Association for a full

scientific program. This includes a resident and fellows' forum, subspecialty oriented and multidisciplinary sessions, collaborative research efforts, and practice management. Membership includes Black urology thought leaders from major academic institutions and private practices, many of whom serve as role models for young Black physicians seeking careers in urology.

RFJUS 2023 Program at the NMA: Breaking Down Barriers to Education and Healthcare

The R. Frank Jones Urological Society represents the interests of Black Urologists and is committed to improving the health status and outcomes of minorities and the underserved. This Program is designed to aid Urologists in strategic planning for moving the agenda of health disparities forward within the American Urological Association (AUA) and the nation.

The RFJUS NMA Meeting is an opportunity to collaborate on the latest clinical and scientific research and strategies in several clinical areas pertinent to genitourinary health.
